

# Dekon Intelligent Addressable Fire Alarm System

## Model No: D-AA504 Intelligent Addressable Fire Alarm Panel

### DESCRIPTION:

DEKON D-AA504 Addressable Fire Alarm Panels are designed by the leading technology and microprocessor-based devices. The network connectivity and repeater panel connection are onboard in the panel. By connecting Computer by Ethernet connection, the programming and supervision can be carried out simply. The main goal of the device is robust design and simple user-friendly programming.

DEKON D-AA504 Addressable Fire Alarm Panel is manufactured in SMD Technology and compile with EN 54-2/4 standard. The centrals are compatible with all detectors and devices of DEKON Brand.

On main board, there are 4 loop connectors for LK401 loop cards. By installing LK401 loop cards the panel can host up to 4 loops. There can be installed 250 detectors per loop upgradable to 1000 devices per panel.

### FEATURES

- 1-4 Loops, 250-1000 Node Capacity.
- AA45R Repeater Connection.
- Metal Case.
- 128x64 Graphic LCD Display.
- 16 Zone LEDs, 250 Zones.
- Programmable Zone Contents.
- Alarm and Error Relay Outputs.
- Supervise Siren Output.
- 3 Programmable Sound/Indicator Outputs.
- Event Log.
- Turkish and English Language.
- RS485 Serial Interface.
- Real Time Clock.
- EN54-2/4 Compatible.
- Dimensions: 34,5x36x10,5cm
