

# Dekon Conventional Fire Alarm System

**Model No: D-CO401K Carbon Monoxide Detector with Relay**

## DESCRIPTION

D-CO401K Carbon monoxide Detector is designed for fire alarm system for reporting Carbon monoxide gases (CO), CO is a colorless, tasteless and odorless compound produced by incomplete combustion of carbon-containing materials, CO detectors are designed to measure CO levels over time and sound an alarm before dangerous levels of CO accumulate in an environment. When the Gas Leakage perceived, it transmits an analog representation over a communication line to the control panel.

## FEATURES

- Carbon monoxide Gas Detection.
- Optically Isolated.
- Alarm and Fault Supervision.
- Test Button.
- Light way indication.
- Normally Closed and Normally Open Contact Connectors for Relay.
- Dimensions: 8,8x8,8x4,8cm; Weight: 152gr.
