

# Dekon Intelligent Addressable Fire Alarm System

## Model No: D-GS290 Addressable Gas Detector

### DESCRIPTION

D-GS290 Addressable Gas Detector is designed for addressable fire alarm system for reporting gas leakage condition. Detect all sorts of combustible gases, natural gas (methane), bottled gas (propane), LPG (Liquefied petroleum Gas), CNG (natural gas), coal gas, including town gas.

When the Gas Leakage perceived, it transmits an analog representation over a communication line to the control panel. Inside MCU's EEPROM keep the sensor's address that can be set by a portable Address setting device PP201 Device Programmer.

### FEATURES

- LPG and Natural Gas Detection.
- Optically Isolated.
- Alarm and Fault Supervision.
- Test Button.
- Light way indication.
- Addressable Loop Connection.
- EN12094 Compatible.
- Dimensions: 8,8×8,8×4,8 cm; Weight: 152 gr.
