

# Dekon Intelligent Addressable Fire Alarm System

## Model No: D-SA340 Loop Powered Addressable Indoor Sounder with Beacon

### DESCRIPTION

D-SA340 Loop Powered Addressable Indoor Sounder with Flasher series are designed for use of audible/visual indication in addressable system.

D-SA340 series sirens are ideal for warning during an emergency event, providing primary and secondary signaling for fire and security applications such as hotel, motel or residential fire system applications. D-SA340 series sounders produce a loud sound to notify occupants to evacuate the buildings.

D-SA340 series sounders can be connected to addressable fire alarm system on the loop. Inside MCU's EEPROM keep the device address that can be set by a portable Address setting device PP201 Device Programmer. The sounder can be given 1-250 address id.

Upon activation the D-SA340 starts to sound and illuminates four red indicator through light guides, situated inside the device. The visual indicators provide 360° visibility. The device can be reset and extinguished by momentarily removing the power source.

D-SA340 series sirens are fixed to DD-T base. So they can be put on any DEKON detector base. The bases can be installed to wall or ceiling.

### FEATURES

- No Extra Power Needed.
- Red Transparent.
- 4 LED Animated.
- Sound Pressure 95dBA at 1 Meter.
- Fits DD-T Detector Base.
- EN54-3/13 Certified. Cert. No: 0370-CPR-2648, COC: UAE-1177/PR-1801-064.
- Height: 6.5c;, Diameter: 10cm; Weight: 196Gr.
