

# Dekon Conventional Fire Alarm System

## Model No: D-K8A Conventional Fire Alarm Control Panel

### DESCRIPTION

D-K8A 8 Zone Conventional Fire Alarm Control Panels are designed by the leading technology and microprocessor-based devices. The devices are user-friendly and simple to understand. DEKON D-K8A is 8 Zone Conventional Fire Alarm Panels.

On both devices there separate auxiliary power outputs 24V. For installation of additional functional devices there is no need an additional power source as they are available onboard.

DEKON D-K8A is 8 zone centrals. The devices are manufactured in SMD Technology and compile with EN 54-2/4 standard. The centrals are compatible with all detectors and devices that comply with EN54 standards.

### FEATURES

- 8 Zone.
- Separate Alarm, Short circuit, Open circuit and Bypass LEDs for each zone.
- Key lock for Access Level 1.
- Plastic Case.
- User friendly installation and programming.
- Day/Night Mode.
- RS232 Interface.
- 1 Supervised Siren Out.3 Open Collector Outputs.
- Alarm and Error relay Outputs.
- 12V and 24V Auxiliary Power Outputs.
- EN54-2/4 Compatible.
- Dimensions: 26x31x9 cm; Weight: 1940gr.
